

An explanatory note:

This bibliography for the most part focuses upon '*Primarily Cartridge Oriented*' works, and leaves many works where Cartridges are secondary or tertiary to the work off the list. No attempt made to list each edition of a work, such as "Cartridges of the World", instead the last known, or the most commonly available edition is usually listed, to assist persons in finding a copy. Some company histories are included, to simply make persons aware of what exists.

Some reloading manuals (see 'Reloading Manuals') are included, but by no means has any attempt been made to list them all. Some such as Lapua or A-Squares contain valuable information upon the companies, and upon their products, and are also listed under the author's name. Many Government publications will be listed under headings such as "U.S. Government Publications", or "H.M.S.O" (for British Government publications).

Many company catalogues are not listed, due to the sheer volume. However, some that contain histories etc., are usually listed under the company's name.

Reloading Manuals - This listing contains *factory produced* reloading manuals, though some may be listed elsewhere under the author or compilers name. Due to the 'brand specific' nature of reloading manuals it is only intended for this listing to ensure members are aware of different manuals available. Additionally some include articles relating to specific rounds, such as the Lapua Manual, which for example contains a history on the 338 Lapua Magnum:
